PROFESSIONAL SUMMARY

Results-oriented Software Engineer with over 2 years of professional experience in full-stack development, specializing in building scalable and enterprise-grade solutions. Strengths include architecting complex systems, including comprehensive Core Banking Systems (CBS), educational ERPs, and inventory management platforms. Proficient in modern frameworks and tools including Angular, Ionic, React, Node.js, Next.js, and TypeScript. Experienced in designing secure applications utilizing Firebase, Google Cloud Secret Manager, and .NET environments. Strong background in database management with Firestore, MSSQL, and MongoDB along with RESTful API development and integration.

PROFESSIONAL EXPERIENCE

Junior Software Engineer | ImplevistaBD

Aug 2024 – Jul 2026

Dhaka, Bangladesh

- Architected and maintained highly scalable enterprise applications utilizing the Angular, Ionic, Node.js, and Firestore stack, strictly adhering to TypeScript best practices and reactive state management.
- Designed and implemented a custom "Pessimistic Locking System" featuring a heartbeat mechanism to safely manage concurrent data editing across distributed Firebase environments.
- Integrated Google Cloud Secret Manager to securely handle API credentials and deployed Document AI for custom optical character recognition (OCR) extraction features.

Software Engineering Intern | ImplevistaBD

Feb 2024 – Aug 2024

Dhaka, Bangladesh

- Authored complex recursive migration scripts to cleanly synchronize Firestore collections between development and testing environments.
- Collaborated in building responsive frontend components and integrated backend APIs to support enterprise application scaling and stability.

PROFESSIONAL PROJECTS

BOG PRO | [Website](#) | Professional

- Engineered and optimized robust architectural features, ensuring high performance and reliability for large-scale enterprise inventory operations. Replaced legacy suppression logic with active mitigation functionality and integrated the Combustibility field into duplicate verification logic for highly accurate data processing.
- AI Integration:** Deployed Google Cloud Document AI for custom Optical Character Recognition (OCR), automating complex data extraction for enterprise inventory operations.
- Technologies:**

Angular

Ionic

Node.js

TypeScript

Firebase Firestore

Document AI

GCP Secret Manager

Core Banking System (CBS) | [Website](#) | Professional

- Contributed core functionality to a comprehensive Core Banking System (CBS) for the Co-operative Credit Union League of Bangladesh Ltd. Built a real-time SMS notification system and developed a migration tool for transferring single clients to the CCULBS SaaS server while preserving historical data and business records.
- Technologies:**

.NET

ASP.NET Core

AngularJS

MSSQL

C#

REST APIs

PERSONAL PROJECTS

FlowOS Business Operating System | [Live Link](#) | *Personal*

- Architected a multi-tenant, modular SaaS Business Operations OS integrating CRM, appointment booking, queue management, task tracking, and invoicing.
- Implemented secure multi-tenant isolation via strict Supabase Row-Level Security (RLS) policies and Role-Based Access Control (RBAC).
- Built a real-time finance dashboard featuring SVG trend charts and automated staff commission logging.
- **AI Integration:** Integrated a Groq Llama-3.3 AI engine for automated care plans, service catalog recommendations, and action-item notes extraction.
- Configured Capacitor to package the web application as a fully responsive Android APK for production deployment with dynamic light/dark theme support.

• **Technologies:**

Next.js

React

Supabase (PostgreSQL)

TypeScript

Capacitor (Android/APK)

TailwindCSS

Groq API

Lucide Icons

LaunchFlow | [Live Link](#) | *Personal*

- Architected and deployed a commercial-grade, multi-tenant project and client management SaaS platform.
- Implemented strict PostgreSQL Row-Level Security (RLS) policies and dynamic role-based access control (RBAC) middleware, restricting sensitive financial modules and AI logging tools.
- Designed a fully reactive, real-time dashboard syncing workspace metrics, task statuses, and tax telemetry.
- **AI Integration:** Integrated a Groq-powered AI assistant (Llama-3.3-70b) to automate Scope of Work proposals, Kanban task breakdown generation, and client email drafts.
- Tuned hardware-accelerated animations (0.85s slide-up deceleration) and a dynamic theme switcher with a default light-theme configuration.

• **Technologies:**

Next.js

React

Supabase (PostgreSQL)

TypeScript

Groq API (Llama 3)

TailwindCSS

React Hook Form

ESLint

EDUCATION

B.Sc. in Computer Science and Engineering

2020

University of Asia Pacific | Dhaka, Bangladesh

TECHNICAL SKILLS

Frontend:	React, Angular, Next, HTML, CSS, Bootstrap, Ionic, TailwindCSS
Backend:	ASP.NET Core, .NET Framework, Node.js, Express, Prisma ORM, REST APIs
Cloud & DBs:	Firebase (Firestore), Google Cloud Platform (GCP), SQL Server, PostgreSQL, MongoDB, Supabase
Languages:	C#, TypeScript, JavaScript, SQL
AI & CLI	Google AI Studio, Pi Coding Agent, OpenCode CLI, Continue, GitHub Copilot, Groq API
Tooling:	
Tools:	Git, GitHub, Postman, Jest, Supertest, Playwright, Capacitor
Methodologies:	Project Management, Team Collaboration, Problem Solving, Scrum
